

ACES Aerosol Physics 2017 survey

Answer Count: 4

1. What was the best aspect of the course?

What was the best aspect of the course?

- small class size, and therefore, more time for questions and to dig deep into the subject
- the content was also very relevant for me
- the teachers were available when we needed them

to feel welcome on Aces.

The lectures are well-structured and teachers are all very great!

I learnt a lot about theoretical knowledge about aerosol. It is quite important to me.

2. What improvements would you suggest in the course?

What improvements would you suggest in the course?

- perhaps more lab work, or a bit more about bioaerosols.
- the exam was also much too long. a couple of questions could be removed

looking more on some things instead of like now looking at everything quite short.

Too much information in each lecture and generally we don't have enough time to read the course book after and before each topic.

I think the deduction of the equations could be very helpful for the students to understand the focusing process. But this part is almost skipped, probably because the course is very compact.

I suggest to give students more time to digest.

3. What advice would you like to give to future course participants?

What advice would you like to give to future course participants?

stay on top of the questions and don't fall behind. the course is short and intensive, so you need to keep up with the lectures and work

go to the lectures

Make sure you do not have any other things to do when taking this course. This course need more time to work on than you think.

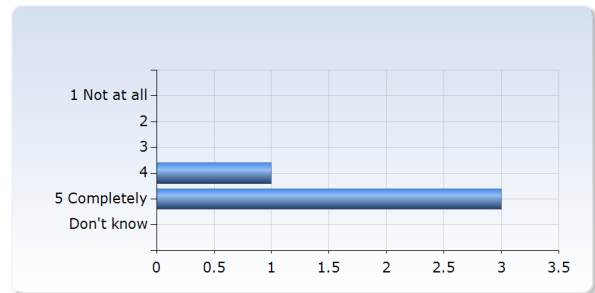

4. Other comments

Other comments

It would be better to have more lab courses.

35-45	1 (25.0%)
45-55	1 (25.0%)
>55	0 (0.0%)
Total	4 (100.0%)

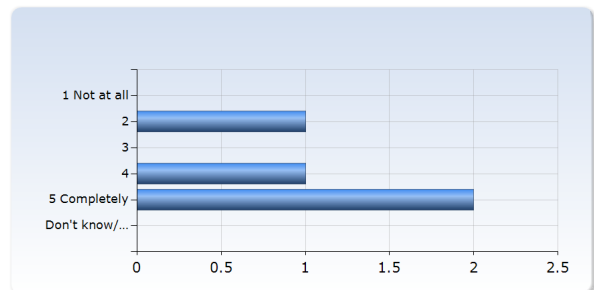

Comment on the work load

Almost each lecture covers a whole chapter of the course book, so there is a lot of reading.
The work load is a bit heavy.
